

VISUALIZE YOUR RESEARCH

SUMMER SERIES

"A picture is worth more than a thousand words."

Visualizing research results is more important than ever. Not only are we more used to images, graphs, and statistics in our environment, but well-designed images and illustrations can also convey and illuminate research results effectively – and persuasively!

The German Centers for Research and Innovation (DWIH) in New York and Tokyo are proud to present the summer program "Visualize Your Research" through which you can obtain the skills necessary to visualize both quantitative and qualitative research – while connecting with young researchers in Japan, the US, and Germany!

WORKSHOP 1 - KICKOFF

July 24, 9:00 JST

"Data Visualization for Aspiring Professionals"

WORKSHOP 2 - POWER UP

August 21, 9:00 JST

"Telling Stories with Data"

LECTURER & COACH

Daniel Sauter

Parsons School of Design

Workshops are limited to 30 attendees. Attendees will be working on a visualization between the two workshops. Participants can connect, exchange ideas and collaborate through supervised Slack channels.

Sign up today, make friends, and become an expert science communicator at:
