

Dr. Carina Vorisek is a medical doctor certified in Germany as well as in the United States. She was working in basic and clinical research completing her PhD thesis in congenital heart disease at Boston Children's Hospital, had clinical rotations at Harvard Medical School and was working clinically in obstetrics/gynecology and general medicine in Germany. After finishing the Principles and Practice of Clinical Research (PPCR) program at Harvard T.H. Chan School of Public Health, she received a master's degree in Clinical Research. Currently, she is doing her fellowship in medical informatics at the Core Facility Digital Medicine and Interoperability at the Berlin Institute of Health at Charité – Universitätsmedizin Berlin. The Core Facility is specialized in international standards such as SNOMED CT and HL7 FHIR where Dr. Carina Vorisek can combine her interests in women's and digital health.
