

Converting the Chemical Industry into a Circular Economy

Lecture and Panel discussion

Tuesday, October 3, 2023

Dr. Carola Richter

President, South & East Asia, ASEAN & Australia / New Zealand, BASF East Asia Regional Headquarters Ltd.

Input Title

“Our Journey to Net Zero 2050”

Abstract

BASF wants to contribute to a world that provides a viable future with enhanced quality of life for everyone. We do so by creating chemistry for our customers and by making the best use of available resources.

Climate change is the biggest challenge of our time. BASF thus aims to achieve net-zero emissions by 2050. To achieve this, we become more efficient in our production and energy usage, we will increase our use of renewable energies and we will accelerate the development and deployment of new CO₂-free processes for the production of chemicals.

In the coming session, BASF will share global and Asian insights on how the chemical industry is contributing to a sustainable future and the success of their customers.
