

Short CV

Dr. Yasui works to connect a variety of advanced technologies with business people to address front-end business needs in markets related to digital, AI, EV, energy, etc. To build the Japanese version of the smart ecosystem, he also worked as a sub-director of two Japanese government-sponsored programmes for about ten years. He received his B.S. and Ph.D. degrees in applied physics from the University of Tokyo in 1982 and 1989, respectively, and was a visiting scientist at Stanford University in 1989. He has worked as a research, operations and strategy manager, developing advanced machines for global customers.
