### FZJ-Tokyo Tech Workshop "Hydrogen" (Tokyo, April 16)

The research exchange on "Hydrogen and chemical hydrogen storage" is an informative and stimulating event focused on the future role of hydrogen as a clean energy carrier. In this context, various aspects are being discussed. Overall, the scientific exchange between FZJ and Tokyo Tech emphasizes the significance of hydrogen technology and chemical hydrogen storage for a sustainable energy future and the transition to a low-carbon society.

### Mobility2Grid: Electrification of public transportation in Japan and Germany (Hybrid, May 7-9)

The research campus Mobility2Grid and the Intelligent Transport Systems Laboratory at Kyoto University explore strategies for electrified public transport in a comparative 3 days workshop. Hosted at Kyoto University, this workshop aims to foster German-Japanese collaboration, advancing academic and industry partnerships towards achieving climate-neutral transportation. This event delves into the complexities of electrification, including depot functions, vehicle-to-grid integration, and the socio-environmental implications of electric mobility.

### DAAD Green Hydrogen Fellowships (Reminder)

[Deadline: 2024/04/10] The DAAD offers special scholarships to do research in Germany in the field of "green hydrogen". There is also a parallel program for students from Germany who wish to go to Japan. Master and PhD students as well as postdoc are welcome to apply. The program covers studies, research stays and internships on green hydrogen topics across various disciplines, also including social studies. PhD students and PostDocs can apply at any time. Applications for Masters students can be submitted anytime until April 10, 2024.
